

Odometer Reset Form

There are situations when your odometer fails to operate properly and needs to be repaired. Sometimes we are able to retrieve the correct reading and fix your odometer but there are situations when the mileage reading is damaged and in these situations the customer must provide true odometer reading for his (her) vehicle. When this happens you must supply us with a Notarized Odometer Disclosure Statement and a copy of the title of the vehicle.

By signing this contract the Customer assumes the legal responsibility regarding the true odometer reading for his (her) vehicle and acknowledges that it is a State and Federal Crime to knowingly have the odometer set to a different reading then that of the true reading for his (her) vehicle.

By signing this form you authorize Eastern Electronics Inc, to perform service work on your vehicle's odometer and agree that you are the only one responsible for accuracy of the information you provide.

You agree that Eastern Electronics Inc. shall be held not liable and agree to indemnify its employees and assigns from any and all claims, cause of action, demands, rights and attorney fees relating to or arising out of Eastern Electronics Inc. work on the odometer.

You are required to send a notarized odometer disclosure statement and a copy of the title of the vehicle.
